

LMS FEATURE

COLLABORATIVE COMMUNICATION

Use online tools to **Facilitate Collaborative Learning**

If your organization recognizes the benefits of collaborative work and communication, then the Collaborative Communication feature is essential to your learning solution. This feature allows users to communicate and collaborate via the Web within the safe, secure environment of the LMS.

Chat Rooms, Discussion Boards, and System Messaging can be used or added to any course for a robust learning experience. These tools facilitate real-time conversations and collaborations and are great for group projects. Collaborative Communication allows administrators and learners to collaborate via the Web no matter their location.

Allows you to...

- Incorporate collaboration into course assignments
- Add communication features to any course
- Facilitate real-time conversations and group work
- Post and search for topics and threads
- Stay connected with all learners within the safety of the LMS

COLLABORATIVE COMMUNICATION...

allows every member of your organization to communicate and collaborate via the Web, within the safe environment of the LMS.
