

LMS FEATURE**FILE
SHARING****Upload and share learning materials to
Create a Complete Learning Solution**

The File Sharing feature allows administrators and learners to upload and share files within the security of the Learning Management System (LMS). Files can be attached to Courses or Events to create a complete learning solution for your organization. Users also have the ability to download and print shared files.

Users may also select files to modify and then re-upload the files to their administrator or instructor. Files as large as 500K can be uploaded and shared in the system. Many users find added value in this feature because it allows them to access files from any computer with Internet access at anytime, from anywhere.

Allows you to...

- Share course materials within the safety of the LMS
- Incorporate collaborative projects
- Upload, store, and work on files
- Access files from any connected computer
- Download and print shared files
- Attach files to Courses and Events

FILE SHARING...

allows anytime, anywhere access for administrators and learners to collaborate by uploading and sharing files within the LMS.
