

LMS FEATURE

PRESCRIPTIVE LEARNING

Save time and money with **Training Based On Individual Needs**

Prescriptive Learning is an exclusive feature of the How To Master Learning Management System. This unique feature is the most effective approach to performance management available today. It allows learners to first complete a pre-test to determine their knowledge and proficiency levels. Then the system automatically assigns a tailored learning solution based on the exact needs of that learner. Prescriptive Learning also tests the learner after the training has been completed to ensure that all learning objectives were met. This feature saves time by giving the learners only what they need, while also allowing administrators to set proficiency levels tailored to the training needs of the organization.

Allows you to...

- Tailor training to the needs of each learner
- Give a pre-test to determine learning needs
- Match proficiency levels with training lessons
- Provide your organization with the most efficient approach to performance management

PRESCRIPTIVE LEARNING...

Offers a unique and effective approach to providing personalized learning to every member of your organization.
