

**LMS FEATURE**

# **SURVEY AND TEST BUILDER**

Create new or upload existing questions to  
**Build Customized Tests and Surveys**

The Survey and Test Builder feature is a customer favorite. This tool allows administrators to create custom surveys, quizzes, and tests on any training or organizational need. These can be distributed electronically and tracked through the LMS. Answers are electronically organized into online reports for easy viewing and can also be exported. Now it is easier than ever to receive feedback on your training program or to analyze assessments based upon organizational performance requirements. Several question templates allow for maximum flexibility, while the Import feature allows pre-existing questions to be imported quickly and easily. A question bank stores questions for future use on an individual or group basis.

**Allows you to...**

- Generate a variety of question types
- Create custom assessments quickly and easily
- Import questions for rapid results
- Edit both core and custom tests
- Analyze important survey feedback and test answers with ease
- Meet organization requirements with custom assessments

## **SURVEY AND TEST BUILDER...**

builds custom surveys, quizzes, and tests, making it easier than ever to receive feedback or analyze assessments in your organization.
